INDEX TO VOLUME 21

*Starred items are "Shorter Notes"

Aarnes, J. F. and Kadison, R. V. *Pure states and approximate identities*, 749.

Accola, R. D. M. *Riemann surfaces with automorphism groups admitting partitions*, 477.

Allen, P. J. *A fundamental theorem of homomorphisms for semirings*, 412.

Appel, K. I. *On two variable equations in free groups*, 179.

Atalla, R. and Bustoz, J. *On sequential cores and a theorem of R. R. Phelps*, 36.

Baggett, Larry. *Hilbert-Schmidt representations of groups*, 502.

Baker, J. W. and Rothman, N. J. *Separating points by semicharacters in topological semigroups*, 235.

Bauman, S. *A note on cover and avoidance properties in solvable groups*, 173.

Bennett, Ralph and Transue, W. R. R. *On embedding cones over circularly chainable continua*, 275.

Bing, R. H. *Retractions onto ANR's*, 618.

Birman, J. S. *Automorphisms of the fundamental group of a closed, orientable 2-manifold*, 351.

Blair, D. E. and Stone, A. P. *A note on the holonomy group of manifolds with certain structures*, 73.

Bose, A. K. *A note on entire functions of bounded index*, 257.

Bragg, L. R. and Dettman, J. W. *A class of related Dirichlet and initial value problem*, 50.

———. *Multinomial representation of solutions of a class of singular initial value problems*, 629.

Brooks, J. K. *Decomposition theorems for vector measures*, 27.

Brown, J. W. *New generating functions for classical polynomials*, 263.

Brown, R. F. *A fixed point theorem for open Q-acyclic n-manifolds*, 621.

Bustoz, J. See Atalla, R.

Butt, Shu-shih. *On minimal nondetermining subalgebras of group algebras*, 427.

Byrnes, J. S. and Newman, D. J. *Completeness preserving multipliers*, 445.

Chaney, R. W. *On uniformly approximable Sidon sets*, 245.

Chrislock, J. L. *A certain class of identities on semigroups*, 189.

Collins, H. S. and Summers, W. H. *Some applications of Hewitt's factorization theorem*, 727.

Comer, S. D. and Le Tourneau, J. J. *Isomorphism types of infinite algebras*, 635.

Constantin, Gh. See Istrăţescu, I.

Cossey, John and Whittemore, Alice. *On the Frattini subgroup*, 699.

Cox, R. H. and Powell, R. E. *Regularity of net summability transforms on certain linear topological spaces*, 471.

Crandall, M. G. *Norm preserving extensions of linear transformations on Hilbert spaces*, 335.

Cuppens, Roger. *On the decomposition of infinitely divisible characteristic functions with continuous Poisson spectrum*, 145.

Curtis, D. W. *Deficient subsets in locally convex spaces*, 289.

Dean, R. A. and Evans, Trevor. *A remark on varieties of lattices and semigroups*, 394.

Dettman, J. W. See Bragg, L. R.

Dickman, R. F., Jr. *A theorem on one-to-one mappings onto the plane*, 119.

Dikshit, H. P. *Summability of a sequence of Fourier coefficients by a triangular matrix transformation*, 10.

Dubuc, Serge. *Positive harmonic functions of a branching process*, 324.
